

Slow progress: despite promises by the Federal Government to streamline the approval process for new wind farms, expansion remains sluggish.

Burnt wastelands: the planned free trade agreement between the EU and Mercosur has drawn intense criticism, above all over reckless rainforest clearing.

Innovative solutions: Iwes researcher Andreas Reuter discusses the latest technological developments in the wind sector.

ENERGY POLITICS

- 3 | Editorial
- 6 | Cooperation with EREF
- 9 | **News:** Wrangling over EU climate targets continues, Germany avoids EEG surcharge hike, Vattenfall to hand over control of Berlin's grid, surge in climate litigation, study charts course to climate neutrality for Germany.
- 11 | **No deal?**
The EU's free trade agreement with South American bloc Mercosur could be on the brink of collapse, due in large part to environmental concerns.
- 14 | **Surprising move**
China has unexpectedly announced tough new climate targets – including a pledge for net zero carbon by 2060.
- 16 | **A costly dilemma**
France's attachment to its ageing nuclear fleet sits uneasily with the country's stated goal of promoting renewables.

BUSINESS

- 19 | **News:** Clean energy jobs on the rise, IEA World Energy Outlook, climate at risk from super-rich.
- 20 | **A fair solution**
Like the vast majority of similar events, leading trade fair WindEnergy Hamburg has gone online in response to the Covid-19 pandemic.

TECHNOLOGIES

- 23 | **News:** A new flavour of battery, methanol reversion breakthrough, researchers warn of nitrous oxide impact, figure of the month.

COVER STORY

Wind power

- 24 | **Mixed messages**
Germany's beleaguered wind industry is grappling with a contradictory policy framework. Is change in sight?

26 | Finding the right balance

Instead of pushing their turbines to the limits, more and more operators are relying on sensors and complex control strategies to keep their machines running smoothly for longer.

30 | "There are unresolved issues that must be solved at the political level"

Andreas Reuter of the Fraunhofer Institute for Wind Energy Systems discusses the state of the German wind industry.

36 | From demos to data

In a study commissioned by Fridays for Future, the Wuppertal Institute has calculated what it would take for Germany to meet the 1.5C target.

38 | Solar valley revisited

A new generation of technological innovators is making waves in Germany's PV sector.

40 | The benefits of sharing

Despite offering significant potential for cost savings, power plants combining wind and solar remain rare in Germany.
